

**January 26 to 29, 2023**

**by Videoconference On line**

This course will explore what happens in the body during Brainspotting. Attendees will learn about:

- ⇒ The anatomy and physiology of the fascial system — especially relative to the freeze response
- ⇒ The neurology of pain and chronic pain within the brain and the body
- ⇒ Three new Brainspotting setups- including BodySpotting- to assist processing physical issues
- ⇒ Movement Integration (MI) to support changes which occur in both the brain and body — for ANY of your Brainspotting clients
- ⇒ Translation available in spanish

*"I HIGHLY RECOMMEND this new Specialty Training.  
It is a PHENOMENAL learning opportunity for all Brainspotting therapists."*  
**David Grand, Ph.D. (Founder of Brainspotting)**
